SUBJECT INDEX

Adrenal glomerulosa cells
  separate induction of the two isozymes of cytochrome $P450_{11\beta}$ in, 213
Androgen(s)
  receptor(s)
    characterization of two point mutations in the, gene of patients with perineoscrotal hypospadia, 127
Antiestrogen(s)
  are breast tumours resistant to tamoxifen also resistant to pure, ?, 107

Brain
  functional implications of, mineralocorticoid receptor diversity, 183
  ontogeny of gene expression of progestin receptor in the, of female rat, 173
Breast cancer
  are, tumours resistant to tamoxifen also resistant to pure antioestrogens?, 107
  mechanisms for tamoxifen resistance in, 83
Breast cancer cells
  mechanism of synergistic action on all-*trans*- or 9-*cis*-retinoic acid and interferons in, 123
Breast epithelium
  cyclin gene expression and growth control in normal and neoplastic human, 99

β-Casein
  gene promoter, transcription of, in mammary gland, 21
Catecholamine
  estrogen modulation of, synthesis in the human neuroblastoma cell line SK-ER3, 207
Central nervous system
  androgen and progesterone metabolism in, 195
  regulation of cytochrome *P*450 in, 191
Chromatin
  modulates transcription factor binding to the MMTV promoter, 1
Cyclin
  gene expression and growth control in normal and neoplastic human breast epithelium, 99
Cytochrome *P*450
  regulation of, in the central nervous system, 191
  separate induction of the two isozymes of, in rat adrenal zona glomerulosa cells, 213

Decidualization
  direct effect of gonadotropins on, of human endometrial stromal cells, 115

Endometrial stromal cells
  direct effect of gonadotropins on decidualization of human, 115
Estradiol
  regulation of secretory component: expression by rat uterine epithelial cells, 143
Estrogen(s)
  modulation by, of catecholamine synthesis and monoamine oxidase A activity in the human neuroblastoma cell line SK-ER3, 207
  receptor(s)
    hormone binding and transcription activation by, in mammalian and yeast systems, 39
  role of, in the feedback regulation of follicle-stimulating hormone secretion in the female rat, 161

Fatty acids
Xenopus peroxisome proliferator activated receptors: genomic organization, response element recognition, heterodimer formation with RXR and activation by, 65
Fetal adrenal(s)
regulation of expression of the 3β-hydroxysteroid dehydrogenases of human, 151
Follicle-stimulating hormone
role of estrogen in the feedback regulation of, secretion in the female rat, 161

Gene(s)
androgen receptor, in patients with perincoscrotal hypospadia, 127
cyclin, expression and growth control in normal and neoplastic human breast epithelium, 99
milk protein, glucocorticoid receptor binding sites in the promoter region of, 75
transcription of the β-casein, is enhanced by activated mammary gland specific nuclear factor, 21
Glucocorticoid(s)
receptor(s)
ATP-dependent cycling and hormone-dependent hyperphosphorylation of, 31
binding sites in the promoter region of milk protein genes, 75
conversion of, to high affinity nuclear binding and transcription enhancement activity in Chinese hamster ovary cells, 55
expression of the mouse, and its role during development, 49
structure and function of, 11
Gonadotropin(s)
direct effect of, on decidualization of human endometrial stromal cells, 115
Growth factor(s)
androgen-induced, and its receptor in mouse mammary carcinoma cells, 91

3β-Hydroxysteroid dehydrogenase
regulation of expression of, in human placenta and fetal adrenal, 151

Interferon(s)
mechanism of synergistic action of all-*trans*- or 9-*cis*-retinoic acid and, in breast cancer cells, 123

Mammary cancer cell(s)
androgen-induced growth factor and its receptor in, of mouse, 91
Mineralocorticoid(s)
receptor(s)
functional implications of brain, diversity, 183
MMTV promoter
chromatin modulates transcription factor binding to, 1

Perineoscrotal hypospadia
characterization of two point mutations in the androgen receptor gene of patients with, 127
Peripherous nervous system
androgen and progesterone metabolism in, 195
Placenta
regulation of expression of the 3β-hydroxysteroid dehydrogenases of human, 151
Progestin(s)
receptor(s)
ontogeny of expression of, in the female rat brain, 173
Prostate cancer
hormonal regulation of TGFβ-2 expression in human, 137
Protein 2
sterol carrier: a role in steroid hormone synthesis?, 167

Receptor(s)
androgen(s)
characterization of two point mutations in the, gene of patients with perineoscrotal hypospadia, 127
estrogen(s)
hormone binding and transcription activation by, in mammalian and yeast systems, 39
glucocorticoid(s)
ATP-dependent cycling and hormone-dependent hyperphosphorylation of, 31
binding sites in the promoter region of milk protein genes, 75
conversion of, to high affinity nuclear binding and transcription enhancement activity in Chinese hamster ovary cells, 55
expression of the mouse, and its role during development, 49
structure and function of, 11
mineralocorticoid(s)
functional implications of brain, diversity, 183
progestin(s)
ontogeny of expression of, in the female rat brain, 173
Retinoic acid
mechanism of synergistic action of all-*trans*- or 9-*cis*-, and interferons in breast cancer cells, 123
mRNA
of 3β-hydroxysteroid dehydrogenases in human placenta and fetal adrenal, 151
of mouse glucocorticoid receptor and its role during development, 49
of progestin receptors: ontogeny of expression of, in the female rat brain, 173

Steroid hormone synthesis
role of sterol carrier protein 2 in, 167

Tamoxifen
are breast tumours resistant to, also resistant to pure antioestrogens?, 107
mechanisms for, resistance in breast cancer, 83
Transforming growth factor β-2
hormonal regulation of, expression in human prostate cancer, 137

Uterine epithelial cells
estradiol regulation of secretory component: expression by, of the rat, 143
